I CLAIM:

5

10

- 1. A scooter comprising:
 - a footrest plate having a rear end;
- a motor-mounting seat pivoted to said rear end of said footrest plate;
 - a rear wheel;
 - a transmission unit;
 - a power driving unit mounted on said motormounting seat for driving said rear wheel through said transmission unit; and
 - a shock-absorbing unit pivoted to said footrest plate adjacent to said rear end of said footrest plate and pivoted to said motor-mounting seat for absorbing shock resulting from operation of said power driving unit.
- 2. The scooter as defined in Claim 1, wherein said 15 motor-mounting seat includes an upper plate upon which said power driving unit is seated, and two transversely extend that plates side respectively from two opposite sides of said upper plate and that respectively have free ends formed 20 with two aligned first pivot holes, said scooter further comprising a pivot shaft extending through said first pivot holes in said side plates of said motor-mounting seat and said rear end of said footrest plate, and a pin, said shock-absorbing 25 unit being pivoted to said side plates of said motor-mounting seat through said pin.
